

# AIR TECHNOLOGY FOR EFFECTIVE WASTEWATER TREATMENT

# WASTEWATER SOLUTIONS

Wastewater industries around the world have been using ESAM to improve aeration performance since 1984.

When reliability is important, and constant operation is required, the choice is ESAM air technology.

## WASTEWATER APPLICATIONS

- PURIFICATION AND OXYGENATION
- LIQUID PUMPING
- CLEANING SEWERAGE NETWORKS
- WASTEWATER DISPOSAL

## **PURIFICATION AND OXYGENATION**

Pressurised oxygen at the maximum yield necessary to help purify wastewater in sludge tanks

## **LIQUID PUMPING**

Transferral of slurry with high suspended particle content from tank to tank

## **CLEANING SEWERAGE NETWORKS**

Remove wastewater, clean networks and flush systems periodically

## **WASTEWATER DISPOSAL**

Collect, drain and remove wastewater from source in one process
